

One-third of your body's protein comes from collagen. Notwithstanding, natural collagen production begins to wane at age 25 and continues to decline. As we age, collagen depletion can lead to common signs of aging in the skin, hair, nails, muscles, tendons, ligaments, and bones. So, including a daily dose of collagen as part of our supplement regimen would be the right solution to aging problems, and the correct step to have long term healthier body and skin.

There are 16 types of collagen in the human body: include Collagen Type 1&3 and each of them has a vital role in the maintenance of body's health and strength and giving it luster and beauty.

Type 1 Collagen:

Minimizes fine lines and wrinkles and improves skin elasticity and hydration. Not only does it help rebuild your muscles, eyes, bones, and spine, it's also good for strengthening your nails and helping you grow stronger, thicker hair.

Made in USA

Type 3 Collagen:

Is found in large quantities in your intestines, muscles, blood vessels, and the uterus. It's most often used with type I collagen for gut healing and to improve skin elasticity and hydration.

Conceal years of tire and exhaustion with **Genuine Collagen + C** which comes in a 120 tablets container, carrying the premium American quality. It nourishes and tightens your skin for a gorgeous youthful appearance.

Your skin is in dire need of collagen in order to provide it with healthy structure, flexibility, and durability.

It contains BioActive GenoCell Collagen which supports healthy collagen formation throughout the body. Using GenoCell's technologically advanced hydrolyzation process, large collagen molecules are enzymatically hydrolyzed into small peptides that are both bioavailable and bioactive in the body.

SUGGESTED USE: Take six (6) tablets daily. For maximum absorption, take on an empty stomach.
